# KAVITHA S

**BCA Student | Cybersecurity | Software Development | Cloud & IoT**

Bengaluru, Karnataka • +91 86182 87756 • mk.kavitha2006@gmail.com

## ABOUT

Motivated BCA student interested in Cybersecurity and Software Development, with hands-on experience building full-stack and Python-based applications and working with IoT systems. Familiar with Python, JavaScript, React, Node.js, MongoDB, SQL, networking, Linux, AWS fundamentals, and REST APIs. Currently developing an IoT cybersecurity project and expanding practical security skills through hands-on labs. Seeking an internship to gain industry experience and contribute to meaningful technical projects.

## EDUCATION

**Bachelor of Computer Applications (BCA) — 7.9 CGPA** — **Pursuing • 5th Semester**
*RR Institute of Management Studies, Bengaluru*

**Pre-University (12th Standard) — 94.32%** — **2024**
*Mangalore Independent PU College, Bengaluru*

**10th Standard — 91.36%** — **2022**
*R V English Medium High School, Bengaluru*

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming** | Python, C, C++, Java, JavaScript, SQL |
| **Web & Backend** | HTML, CSS, React, Node.js, Express.js, Flask, REST APIs, JSON |
| **Databases** | MongoDB, MySQL |
| **Cybersecurity** | Networking, CIA Triad, Phishing, Malware Basics, Password Security, Ethical Hacking Fundamentals |
| **Cloud & IoT** | AWS Fundamentals, ESP32, DHT22, PIR, MQ Gas Sensor, Reed/Door Sensing, ThingSpeak |
| **Tools** | Git, GitHub, Linux, Wireshark, VS Code |

## PROJECTS

**CyberNerd — IoT Cybersecurity Monitoring System** — **Ongoing**
- Developing an ESP32-based monitoring and security system using DHT22, PIR, MQ gas and door/reed sensors.
- Building a Flask backend with ThingSpeak monitoring and a local honeypot component for security demonstration.
- Designing the cybersecurity detection and alert layer as part of a college project.

**MERN QR Smart Library Management System** — **Completed**
- Built a full-stack library management system using React (Vite), Node.js/Express and MongoDB.
- Implemented role-based access for administrators, librarians and users, with QR-based library functionality.
- Developed backend APIs and database operations, and managed the local development workflow.

**Weather Analysis & WhatsApp Notification System** — **Completed**
- Developed a Python application integrating a weather API to fetch real-time weather data.
- Automated WhatsApp weather alerts using API integration, data handling and task scheduling.

## CYBERSECURITY PRACTICE & CERTIFICATIONS

**Cybersecurity Practice**
- Hack The Box beginner practice — 2 rooms completed.
- Linux and Windows fundamentals in controlled lab environments.
- Basic enumeration, vulnerability concepts and security problem-solving.

**Certifications & Learning**
- Introduction to Cybersecurity — Simplilearn
- AWS Cloud Computing
- Python Basics
- Networking and Cloud Computing Fundamentals

## CORE STRENGTHS & INTERESTS

**Strengths:** Problem Solving • Analytical Thinking • Team Collaboration • Communication • Time Management • Willingness to Learn

**Interests:** Cybersecurity & Ethical Hacking • Cloud Technologies • Software Development • Practical Technical Labs
